# Orchids

L. SHERMAN ADAMS CO.

CATALOGUE OF  
**Orchids**

**L. SHERMAN ADAMS CO.**  
**WELLESLEY, MASSACHUSETTS**  
**U. S. A.**

PRINTED  
IN U.S.A.

WE take great pleasure in presenting our catalogue to the trade, and to all who are interested in growing flowers for pleasure.

Many people who have a small green-house, or a tiny lean-to, do not realize the joy that orchids can bring to them. They can be had at prices to fit any purse, and will take less room and produce more flowers with greater lasting qualities, than any other genus, we believe. Many varieties are of easy culture and can be grown with success by any amateur. Even a small collection can be arranged to produce flowers throughout the year. In England, where orchids are of older culture, there are over four thousand amateur growers with collections of twenty to one hundred plants and upwards, who have enjoyed marked success.

We offer an excellent selection of Modern Hybrids, and a number of interesting and beautiful species. We have also a very large collection of well-established seedlings of the finest parentage, which should produce outstanding varieties. Only well-established, strong, healthy stock is offered.

Prices on flowering plants or seedlings on this List will gladly be furnished on application. We invite your inspection on Saturdays and Sundays, or by appointment on any week-day.
